3 SECONDS

Time to Watching The Signboard.

People looking for informations which they need or do not need.
With sign boards only, you do not have a chance to tell customers what your brand is doing.

IMAGES

The Brain Memorize Image Better

Are you hungry?
You will remember food image first than a name of the store.
When it comes time to cut hair, peoples think of the hair rather than the beauty room.

ADVANTAGES OF RENTAL PROGRAM

1st **Monthly Low Cost**
Rental Fee Model : NV-P5-503
Only **$99** /mo

2nd **Maintenance Fee**
Maintenance Every Months
Only **$10** /mo

3rd **Warranty Free**
3 Years Warranty Free
3 Years

4th **Easy to Change Contents**
Contents Design and Upload by Online
Design

5th **Low Cost Installation Fee**
Installation Fee
Only **$100** One Time

CUSTOMER SERVICE

Design service
- Dynamic and eye-catching layout elements tailored to your brand
- Dynamic screens with unique motion graphics and videos
- Animated static logos, text and graphics for more impact

Warranted service
- 24 / 7 / 365 Support

We always offer real time, live support.
If you're experiencing a problem, we will be available to walk you through troubleshooting and always provide a solution.

HIGH BRIGHTNESS DETAILS

DAYTIME

Display with :
nex Vision P5 50”

Brightness :
6000(cd/m2)

20 TIMES MORE BRIGHT THAN TV

DAYTIME

Display with :
Commercial TV 55”

Brightness :
300cd/m^2

WHAT IS DIFFERENT

1. HIGH RESOLUTION SUPERIOR PICTURE QUALITY

Auto Contrast Enhancer optimizes screen contrast to create deeper blacks and purer whites, resulting in vivid image expression and superior texture.
Additionally PurColor technology increased the number of color adjustment points by a factor of seven, resulting in a rich and detailed range of colors.

2. HIGH BRIGHTNESS INDUSTRY’S HIGHEST-QUALITY, TIER-ONE LED DIODES

LED signage combines top-tier diodes with exclusive proprietary technology to deliver incredibly life-like picture quality already proven with TV and Smart Signage.
Fabricated with top-tier diodes, LED signage boasts deeper contrast and a wider viewing angle.

3. FULL COLOR LED ADVANCED COLOR CALIBRATION

Advanced color calibration reduces color expression gaps that can cause distracting image irregularities.
Factory calibration tunes the screen’s individual sub-pixels, ensuring precise brightness uniformity and color chromaticity across each screen.
After installation, the displays can be adjusted on site with embedded calibration software, Smart LED Signage Manager (SLSM).

4. LOW POWER ENERGY-SAVING CABINET DESIGN

Cabinet design extends the lifespan of the display, saves energy and reduces total cost of ownership (TCO).
Adaptive temperature control and improved ventilation lower the display’s heat profile, reducing cooling costs and increasing durability.
The optimized layout of electric circuits minimizes thermal interference and preserves image quality, allowing us to switch to a fanless design that has reduced the ambient noise produced by the display.

5. CHANGE IMAGE FASTER ENERGY-SAVING CABINET DESIGN

Simplify installation and content delivery, an integrated signal box that replaces expensive external video processors.
Able to deliver high-quality, synchronized content to multiple screens quickly and conveniently.

MULTIMEDIA INTEGRATION

ENGAGE YOUR AUDIENCE WITH DYNAMIC VIDEO, MOTION GRAPHICS AND STUNNING IMAGERY, ALL INTEGRATED INTO A SINGLE LAYOUT.
INCREASE REVENUE BY CREATING VISUALLY STIMULATING CROSS-SELL AND UP-SELL ADS THAT THE CONSUMER WILL ENGAGE WITH AND REMEMBER.

How Does NEX Vision Work?

Smart Digital Signage Solution

Building a Digital Signage System involves a simple 3-step process.
You'll need a commercial-grade screen, a digital signage player, and digital signage software.

Installation

Install and Connect the digital signage to the internet (Wired or Wi-Fi)

Update

Remotely, create new content, playlists or even set user permissions for your account

Create Content

Design content and upload from office

Contents Plan
